LAB EXPERIMENT

8. Perform basic Image Handling and processing operations on the image is to read an image in python and Dilate an Image using Dilate function

Code:

```
import cv2
import numpy as np

# Read the input image
img = cv2.imread(r"C:\Users\Admin\Downloads\image 1.jpg")

# Check whether the image is loaded
if img is None:
    print("Error: Image not found!")
else:
    # Create a kernel
    kernel = np.ones((5, 5), np.uint8)

    # Apply dilation
    dilated = cv2.dilate(img, kernel, iterations=1)

    # Display original and dilated images
    cv2.imshow("Original Image", img)
    cv2.imshow("Dilated Image", dilated)

    cv2.waitKey(0)
    cv2.destroyAllWindows()
```
