LAB EXPERIMENT

1. Perform basic Image Handling and processing operations on the image is to read an image in python and Convert an Image to Gray-scale.

Code:

```
import os
import cv2
import matplotlib.pyplot as plt

print("Current folder:", os.getcwd())

# Read the image
img = cv2.imread(r"C:\Users\Admin\Downloads\images.jpg")

if img is None:
    print("Error: Image not found!")
else:
    # Convert BGR to RGB
    img_rgb = cv2.cvtColor(img, cv2.COLOR_BGR2RGB)

    # Convert to grayscale
    gray = cv2.cvtColor(img, cv2.COLOR_BGR2GRAY)

    # Display images
    plt.subplot(1, 2, 1)
    plt.imshow(img_rgb)
    plt.title("Original Image")
    plt.axis("off")

    plt.subplot(1, 2, 2)
    plt.imshow(gray, cmap="gray")
    plt.title("Grayscale Image")
    plt.axis("off")

    plt.show()
```
