LAB EXPERIMENT

17. Design and implement a water marking technique to insert the watermark into the original effectively image using Open CV.

Code:

```
import cv2

# Read the original image
img = cv2.imread(r"C:\Users\Admin\Downloads\images.jpg")

if img is None:
    print("Error: Image not found!")
else:
    # Copy the original image
    watermarked = img.copy()

    # Add watermark text
    cv2.putText(
        watermarked,
        "WATERMARK",
        (50, 50),
        cv2.FONT_HERSHEY_SIMPLEX,
        1.5,
        (255, 255, 255),
        3
    )

    # Display images
    cv2.imshow("Original Image", img)
    cv2.imshow("Watermarked Image", watermarked)

    # Save the watermarked image
    cv2.imwrite("watermarked_image.jpg", watermarked)

    cv2.waitKey(0)
    cv2.destroyAllWindows()
```
